## The Choice is Yours!

You make choices everyday that affect the environment: Should I throw this or that away? What should I have for lunch? Do I buy individual servings or bulk? It's up to you to make a difference. Here are a few ways to begin:

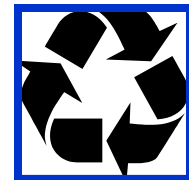

- 1) **At Home**—Learn to reduce, reuse and recycle materials to decrease household waste.
- 2) **At the Office**—Identify opportunities to engage employees to take a good look at what is thrown away. Encourage them to become part of the solution.
- 3) **In the Work Place**—Almost all industrial processes produce waste that can be turned into usable materials. It just takes a moment to discover how reducing, reusing, and recycling can have a positive impact on the environment and the companies bottom line.
- 4) **At the Store**—Take steps when shopping to reduce the amount of waste you generate. Take along your own bags and consider buying bulk the next time you visit the store.

Check out [www.epa.gov](http://www.epa.gov) for further information on how You Can Make a Difference.

**The Choice is Yours!**

## Have You Noticed?

A special thank-you goes out to District part-time staff members Zeth Snook, Logan Wilhelm and Rex Rawles for making needed repairs to the recycling bins and applying a fresh coat of red, yellow and blue paint.

## Did You Know?

If you select a sturdy, washable product that can be used many times, you can significantly reduce our dependency on landfills.
